CONGRESSIONAL.

Quick Time in the Passage of a Bill-Small Attendance. (By telegraph to the Dispatch.)

WASHINGTON, D. C., June 7-SENATE. The quickest time on record in the pas-sage of one of the general appropriasage of one of the general appropria-tion bills was that made in the Senate to day in the case of the diplomatic and consular bill. The amendments re-ported to it by the Committee on Ap-propriations were numerous, and some of them were of sufficient importance to attract attention under ordinary circumstances and lead to discussion, but just as fast as Secretary McCook could read them and President pro tem. Manderson could declare them agreed to they were rushed through. Mr. Hale had charge of the bill, but further than to make a very brief explanation of the group of amendments touching the status of foreign missions he refrained from all remarks, and no other senator said a word. And so, in exactly an hour, the bill was considered and passed.

The calendar was then taken up, but

after passing through unimportant bills the general disinclination to enter upon work in Washington while all public interest was centred in Minneapolis found expression in a motion to adjourn, which was agreed to after the Senate had been in session just an hour and a half.

HOUSE OF REPRESENTATIVES.

A dozen leaves of absence were granted this morning. After its effective work yesterday the House appeared inclined to take a rest, and the attendance at 11 o'clock was small.

The agricultural appropriation bill was reported and placed upon the calenwas reported and piaced upon the calendar and several unimportant private bills were passed by unanimous consent.

The House then went into Committee of the Whole on the urgent deficiency

bill. The bill appropriates \$7,674,332 for the payment of pensions and \$14,000 for the miscellaneous expenses of the House of Representatives.

After a brief explanation by Mr. Sayers, of Texas, and a statement by Mr. Dingley, of Maine, that while there Mr. Dingley, of Maine, that while there was an apparent deficiency of about \$7,500,000 for the payment of pensions there was an unexpended balance of \$8,500,000 the committee rose and the bill was passed. Mr. McRae, of Arkansas, called up as

DOUGLAS-COUNTY JUSTICE.

A Storm of Elequence from a Local Attorney Carried the Day. [Chicago Tribune.]

The officers of the Illinois Humane Society detailed to prosecute the partici-pators in the tame-fox hunt at Fairland are much disturbed over the methods of legal procedure in Douglas county. The action against the fox-hunters was called before Justice Lamb at Tuscola Thursday. Witnesses testified before a jury that a tame fox had been chased by the de-fendants and their hounds and had been caught and torn to pieces by the latter. Attorney A. W. Thomas, of Chicago, cited a Massachuseits decision sustaining the position of the Humane Society, which, while not denying to right of visit Mt. Vernon to-morrow and men to hunt and kill wild foxes, held there meet the regents, who are hold-that a tame fox cared for in captivity by man from the time it was only a few days old is a domestic animal. C. W. Wolverton, of Tuscola, attorney

A number of the regents on Sunday of attended services in old Pohick for the defendants, then addressed the pure where General Washington was about replying to arguments of the Chicago lawyer, but the fact that a Mas-

sachusetts decision had been cited severely wounded his local pride.

"Gentlemen of the jury." he said,
we are residents of the State of Illinois, in the glorious West-wild and woolly, if you will-where each man is an independent American citizen. What is Mas-achusetts? An alien Commonweslth. It is Massachusetts. Why, gentlemen of the jury, on Boston Common to-day witches are burned at the stake, and if a man is found outside of a church Sunday he is placed in a lockup. What has Massachusetts to do with us? We are American citizens, and we want to chase foxes and we chase foxes."

After hearing which the twelve good men and true of Tuscols rendered a vermen and true of Tuscola rendered a verdict for the defendants. The Humane Society had hoped to make this a test case under the State laws, which provide that any person guilty of "torturing any animal" shall be subject to a fine of not more than \$200. The Massachusetts decision was directly in point, and although the justice before whom the action was brought was manifestly imaction was brought was manifestly im-partial, the jury, which was composed largely of friends of the defendants, rendered a favorable decision on the question of law impossible.

ter. Spring No. 2, usually spoken of as No. 2 water, acquired fame per saltum. The marvellous cures it effected in a

large class of diseases immediately at-tracted the attention of leading physi-

cians all over the country. It was a new thing, but it did not share the fate of many new discoveries—that is, have its

run and subside. It came into the medical world to stay and work its miracles of healing, and to-day its repu-

tation is greater than at any time in its history. It is a fixed fact that Buffalo Lithia No. 2 is not given as an experi-

IN WHAT INDICATED.

In enumerating the catalogue of dis-

eases in which the water is indicated, as testified to by the most eminent medi-

cal authority, one hardly knows where to begin. I give a partial list: Bright's disease of the kidneys, gout, rheumatic

gout, rheumatism, stone in the bladder, renal calculi, chronic inflammation of the

urinary passages, diabetes, nervous ex-

haustion and disorders generally, female

haustion and disorders generally, temale diseases, jaundiced conditions, aftereffects of scarlet-fever, "and all diseases of uric-acid disthesis." Under the head quoted are perhaps grouped more disorders and derangements than under any other that could be mentioned. What is meant by disthesis is a condition which predignoses to a per-

there are thousands of sufferers whose

troubles are due to uric-acid diathesis,

grating the deposits therefrom, whether they are uric-acid calculi or chalky de-

posits in the joints. Many of the medical profession had long been skeptical about the resolvent power of any mineral water, but Colonel Goode has hundreds

of testimonials regarding No. 2 water which must dissipate all doubt. Dr.

Hunter McGuire says: "Buffalo

Lithia Water, Spring No. 2, as an alkaline diuretic is invaluable in uric-acid, gravel, and indeed in diseases generally dependent upon a uric-acid diathesis it is a remedy of ex-

traordinary potency. I have prescribed

it in cases of rheumatic gout which had resisted the ordinary remedies and with

wonderfully good results." Dr. Mc-Guire adds: "It has never failed me as a

powerful nervous tonic, when prescribed

In my last letter I dwelt especially on Spring No. 1, or what is known as the Old Spring, though I did not by any manner of means cover the diseases in which its water has proved a blessing to humanity. To attempt to do that would be to write volumes. However, the space of a newspaper letter is necessarily limited, and I pass on to No. 2 Spring. "Speak louder; I'm a trifle deaf," said the old gentleman. "I said I beg your pardon," shouted Codling, while the unfeeling Gorham girls tittered.

But the testimony of laymen is still more astonishing. Men have come here from the Hot Springs, in Arkansas, on cratches, and in a short time thrown away these aids to locomotion. Others have arrived at the aprings in what might be termed the last stages of emaciation and suffering with a complication of diseases, and returned home in a few weeks fat and hearty and entirely restored to health. Papers on parion lar cases in which the patients had been in a desperate condition upon coming to Buffalo, but who were made new men, have been read by the score before the leading medical societies of the country, and the evidence is emphatic and indisputable that some of the curse were little abort of miraculous.
